SUMMARY

Results-driven Infrastructure & Cloud Engineer with 4+ years experience providing top-notch technical assistance Skilled in troubleshooting hardware, software and network issues. Proven track record of collaborating with teams to ensure smooth IT operations. Excellent communicator with a customer first approach. Eager to contribute expertise in maintaining and improving IT infrastructure.

ROLES & RESPONSIBILITY

Infrastructure & Cloud Engineer - Sithafal Technologies

2022 - Present

- Installed and configured **Windows Server**, **SharePoint Server**, and **SQL Server** (2012/2016/2019) in both Azure Cloud and on-premises environments.
 - Deployed and managed **virtual machines** using **Hyper-V** and **VMware**.
 - Performed **server migrations and in-place upgrades**, ensuring minimal downtime and data integrity.
 - Conducted regular **Windows Server patching**, update testing, and rollback planning.
 - Administered and supported both **on-premises Active Directory** and **Azure Active Directory (Azure AD)**, including user identity management, group policies, device joins, and synchronization via **Azure AD Connect**.
 - Performed **bulk password resets and account management** in **Active Directory** using custom **PowerShell scripts**, automating repetitive admin tasks and improving efficiency.
 - Created and managed **Conditional Access Policies** in Azure AD to enforce secure access controls based on user risk, device compliance, location, and application.
 - Implemented and managed **Veeam Backup & Replication** for VM backups and disaster recovery, including backup jobs, restores, and retention policies.
 - Installed and configured **SonarQube** for static code analysis to support application development and code quality checks.
 - Diagnosed and resolved **Windows OS issues** across servers and desktops (Windows 8/10/11).
 - Performed **BIOS and firmware upgrades** for laptops and desktops to enhance hardware compatibility and security.
 - Troubleshoot **SSL VPN** connection issues to support secure remote access.
 - Provided support for **Microsoft 365**, including Exchange Online, Teams, and OneDrive user issues.
 - Worked with **LAN/WAN networking**, handling basic configuration and issue resolution for **firewalls, switches, and routers**.
 - Deployed **Python**, **.NET**, and **React** applications on **on-premises servers** using **IIS**, **Docker**, and Windows-based environments.
 - Gained hands-on experience managing **Ubuntu Servers** for lightweight services and tools.
 - Worked with **Microsoft Azure** for VM provisioning, network configuration, and identity access management.
 - Demonstrated strong analytical and **problem-solving skills** in troubleshooting across systems and applications.
-

SKILLS

- **SharePoint**: SharePoint 2016/2019 Administration, Migration, Issue Troubleshooting
 - **Application Deployment**: IIS, Docker, .NET, Python, React (On-premises deployment)
 - **Server Management**: Windows Server Administration, In-Place Upgrades, Server Patching
 - **DevOps & Automation**: Basic knowledge Azure DevOps (CI/CD concepts), Deployment Automation
 - **Bicep**: Experienced in automating and managing Azure infrastructure using reusable Bicep templates.
 - **Cloud & Infrastructure**: Microsoft Azure (Basic troubleshooting and support), Azure AD
 - **Scripting & Tools**: PowerShell, Command-line tools
 - **Backup Tool**: Veeam Backup and Replication
 - **Networking & Security**: Firewall rules (basic), Routers, Switches Patch management
 - **Monitoring & Support**: System Performance Monitoring, Issue Diagnosis & Resolution
 - **Collaboration Tools**: Microsoft Teams, Outlook, Remote Support Tools (e.g., RDP, Any Desk, TeamViewer)
 - **Soft Skills**: Problem Solving, Communication, Incident Management, Team Collaboration
-

TOOLS

- Ticketing Tool
- Asset Management Tool

CERTIFICATIONS

- Azure Administrator Associate (AZ-104)
- Azure Network Engineer Associate (AZ-700)
- Microsoft 365 Administrator (MS-102)

EDUCATION

Gokula Krishna College of Engineering- Sullurpet, Nellore
Bachelor of technology in Electronics and Communication Engineering

2016 - 2020
CGPA: 7.96 (75.21%)

WORK EXPERIENCE

Infrastructure & Cloud Engineer
Sithafal Technologies Pvt. Ltd.

SharePoint Server Migration & Management

- Successfully migrated SharePoint environment from SharePoint 2016 to SharePoint 2019, involving database upgrades, application configuration, and post-migration validation.
- Set up new SharePoint farm including Web Front Ends, Application Servers, and SQL backend.
- Troubleshoot and resolved SharePoint issues including permission errors, service application problems, and integration issues.
- Managed SharePoint backup, recovery, patching, and performance tuning.

Azure DevOps Migration & CI/CD Automation

- Planned and executed the upgrade of Azure DevOps Server 2020 to 2022, including database migration and service reconfiguration.
- Created and managed build and release pipelines for various application stacks including .NET, Python, and React.
- Enabled integration with SonarQube for code quality analysis and deployed agents across hybrid infrastructure.

Active Directory (AD) & ADFS Implementation

- Set up a new Active Directory Domain Services (ADDS) environment from scratch, including domain controllers, DNS, DHCP, and Group Policy.
- Conducted a comprehensive AD cleanup project to remove stale objects, optimize OU structures, and enforce naming conventions.
- Configured AD Federation Services (ADFS) for secure single sign-on (SSO) access to cloud and legacy applications.
- Automated user onboarding and offboarding processes including email creation, group memberships, and access provisioning.

Backup & Disaster Recovery – Veeam

- Managed daily operations of Veeam Backup & Replication, ensuring full backups and incrementals were successful across on-prem and virtualized environments.
- Restored critical systems and data from backup in test and production scenarios.
- Monitored backup jobs, performed periodic DR testing, and ensured offsite copy compliance.

Application Deployment & Docker Management

- Deployed and hosted custom .NET, Python, and React applications on on-prem Windows servers using IIS and Docker containers.
- Configured reverse proxies, SSL certificates, and DNS entries to enable external and internal access.
- Monitored containerized applications for performance, scaling, and fault tolerance.

Server Management & Windows Upgrade Projects

- Carried out in-place upgrades of Windows Server (e.g., 2012R2 to 2019), ensuring application compatibility and service continuity.
- Applied monthly Windows patches across development, UAT, and production environments.
- Maintained hardware and OS inventory, performance monitoring, and incident response.

Cloud Project Setup & AI Deployment

- Supported deployment of cloud-based AI solutions in Microsoft Azure, including resource provisioning, networking, and access control.
- Worked with development teams to configure environments for data processing, model training, and endpoint hosting.

General IT Support

- Resolved L1/L2 tickets related to user access, system errors, network issues, and application faults.
- Provided remote and onsite support for end-user devices, printers, software installations, and system updates.
- Ensured compliance with IT security policies and industry best practices in a hybrid infrastructure.
